ABOUT US

Powering growth with dependable electrical & civil works

Uday Construction is a Class ‘A’ licensed Electrical & Civil Contractor headquartered in Kulipota, Janjgir-Champa, Chhattisgarh. Founded in 2009 as a partnership firm by Mr. Bhuwaneswar Prasad Sahu, Smt. Shobha Rathore and Mr. Shreyas Rathore, the firm executes high-tension and extra-high-tension electrical works, power distribution infrastructure and allied civil construction for utilities, government departments and private-sector clients.

Our Story

Uday Construction began in 2009 as a local contracting firm in Janjgir-Champa with a simple promise: do the work properly, safely and on time. Early power distribution and civil projects built a reputation for dependable execution and honest dealing.

As the work grew, so did the capability. The firm earned its Class ‘A’ Electrical & Civil Contractor certification, allowing it to take on HT and EHT works without voltage restriction, from substations and transmission lines to underground cabling and solar utility projects.

Today, with more than 500 completed projects and a turnover exceeding ₹100 crore, Uday Construction serves utilities such as CSPDCL and government departments across Indian states and in Nepal, still under the direct, hands-on oversight of its partners.

WHO WE ARE

Vision, Mission & Values

OUR VISION

To be recognised as a dependable, technically sound electrical and civil contracting partner for power distribution and infrastructure development, building outward from our established base in Chhattisgarh to serve infrastructure opportunities across India.

OUR MISSION

To deliver electrical and civil contracting works safely, in full compliance with statutory and client specifications, on schedule, and with transparent communication, building long-term working relationships with utilities, government departments and private-sector clients.

Our Core Values

01 Integrity
Transparent dealings with clients, utilities and authorities.

02 Safety First
Safety is a precondition for every site activity, not an afterthought.

03 Technical Competence
Work executed by people who understand electrical and civil discipline requirements.

04 Timely Execution
Schedules are commitments, not estimates.

05 Client Partnership
Clear communication through every stage of a project.

06 Accountability
Single-point ownership of both electrical and civil scopes under partner-level oversight.

One contractor, one point of accountability: electrical and civil scopes delivered together, safely and on schedule.

CORE EXPERTISE

Class ‘A’ Electrical Contracting

Our Class ‘A’ licence authorises work on **high-tension (HT) and extra-high-tension (EHT)** lines with no voltage restriction, so a single contractor can take a power project from substation to street light.

Substation Erection & Commissioning

33 kV, 132 kV, 220 kV and higher substations: power transformers, switchgear, circuit breakers and control panels.

Transmission & Distribution Lines

HT/LT overhead towers and lines, cabling and expansion of transmission and distribution networks.

Underground Cabling

Urban HV XLPE cable laying, trenchless HDD boring and feeder pillar installation.

Industrial & Commercial Electrification

Internal electrification of complexes, factories and hospitals, busbar trunking, heavy DG sets and synchronised backup.

Street Lighting & Public Works

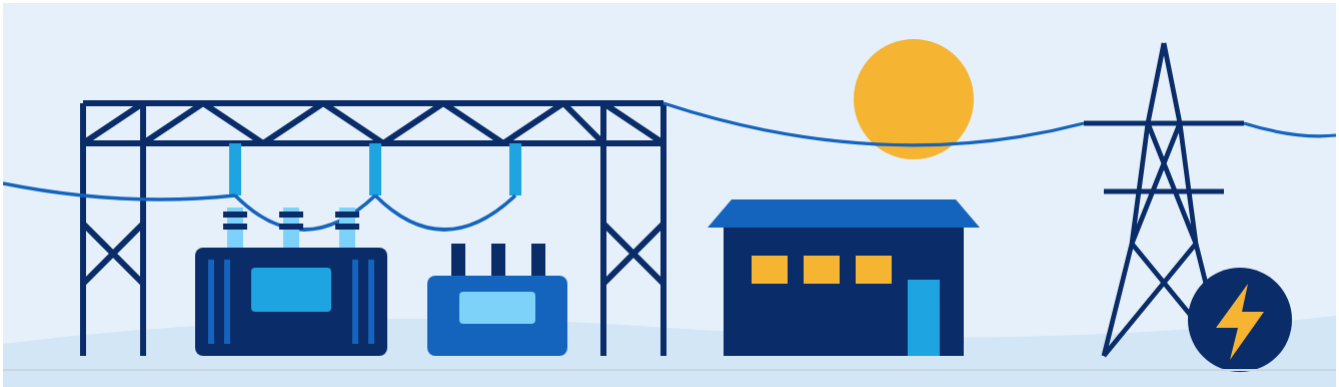

Highway smart LED lighting, high-mast towers, solar street lights and automated lighting control.

Renewable Energy (Solar Utility)

MW-scale on-grid solar plants: installation, grid synchronisation and testing.

Earthing, Lightning & Safety Systems

Industrial earth pits, lightning protection and arresters, and electrical safety compliance auditing.

WHAT WE DO

Our Services

01 Electrical Contracting Services

Installation, wiring and electrical fit-out works executed to applicable safety standards and client specifications.

02 Power Distribution Infrastructure

Distribution line, substation and allied works executed in line with utility and DISCOM requirements.

03 Civil Construction Services

Civil construction supporting buildings, infrastructure and allied electrical installations.

04 Integrated Electrical & Civil Works

Single-contractor execution of combined electrical and civil scopes, reducing coordination, interfaces and delays for the client.

05 Government & Institutional Contracting

Electrical and civil contracting for government departments and public institutions, in line with tender, statutory and documentation requirements.

Quality, Safety & Execution

Quality

Work executed to applicable electrical and civil standards and client specifications, using skilled personnel and verified materials.

Safety

Site safety protocols applied to every electrical and civil activity, with disciplined, trained execution of high-risk power work.

Execution

Projects planned, supervised and delivered to schedule, so clients and utilities can plan around committed timelines.

CLIENTS & REACH

Trusted by utilities and public bodies

Who We Serve

Electricity Boards & DISCOMs	PWD
CPWD	Railways
Municipal Corporations	Private & Industrial Clients

Nepal

Cross-border electrical and civil works.

Why Clients Choose Us

- **Class 'A' licence**: HT & EHT work with no voltage restriction.
- **500+ projects** completed since 2009.
- **Utility experience** with CSPDCL and government departments.
- **Electrical + civil** under one contract and one point of accountability.
- **Partner-level oversight** on every project.
- **In-house team** for projects, stores, supervision and logistics.

LEADERSHIP

Our Founding Partners

FOUNDING PARTNER & MANAGING DIRECTOR

Mr. Bhuwaneswar Prasad Sahu

Leads overall strategy, technical execution and client relationships across every project.

Mr. Sahu co-founded Uday Construction in 2009 with Smt. Shobha Rathore and Mr. Shreyas Rathore, and has led it from a local contractor in Janjgir-Champa to a Class 'A' Electrical & Civil Contractor with 500+ completed projects. He personally oversees project planning, execution and client relationships.

> *"Since 2009, our promise has been simple: do the work right, do it safely and deliver on time. Every substation, line and building we complete carries the Uday Construction name, and I personally stand behind it. Thank you to our clients for their trust."*

FOUNDING PARTNER

Smt. Shobha Rathore

Leads people, training, welfare and workforce planning.

> *"Our strength is our people. From linemen to site supervisors, we invest in training, safety and fair treatment so every team member works with pride. A committed, well-trained team is how we keep our promises to clients."*

FOUNDING PARTNER

Mr. Shreyas Rathore

Oversees operations, planning, materials and site coordination.

> *"My focus is smooth execution: sound planning, timely materials and clear communication with every client. As Uday Construction grows across India and beyond, we are making each project faster, safer and more transparent."*

Three partners, one commitment: building a stronger tomorrow.
